

Kombiz Khayami

42-Rue des Arbrisseaux Vaudreui-sur-le-lac QC • kombizkhayami@outlook.com • (514)-638-4653

Education John Abbott College (JAC), Saint-Anne-de-Bellevue, QC
Computer Science DEC, May (2015)

Projects **Tree project**, JAC **April 2014**
Made a batch script that mimics the BASH tree command, by using a handmade function called mytree to scan files in the present working directory and calls itself when a new directory is encountered. The Script also lets the user input 2 options. -d which only shows directories and -s which displays the size of the file or directory just before the name of the file or directory.

State Analysis/Parsing project, JAC **November 2013**
Made a C++ program that parses a given string value using a finite-state approach. This approach divides the program into one of five states (white, word, number, double, and exponent). The project was split up into 5 different milestones each one building off of one another.

Bike Shop website, JAC **December 2014**
Made a bike shop website using MVC, ASP.net, and C#. Project was split up into 5 milestones with each one building off of the other.

Experience **Administrator**, Gold's Gym Beaconsfield, Beaconsfield, QC **2011 - Present**
Work as an administrator entering, sending and filing contracts as well as assisting in technical support for the computers.

Web Developer Internship, NADdesign, Montreal, QC **2015(January-May)**
Worked as front-end web developer on two projects. First one was using php and wordpress to automate the process for making a facebook contest. Second was using the same programs to set up an instagram event that would display a list of all pictures with the events hash tag on one of the company's main page.

Front End Web Developer Internship, Parlor Club, Montreal, QC **2016(May-August)**
Worked as a front-end web developer adding a new section to their site that hosts a tailored made collection based off an event called "Diner en Blanc". This was accomplished using Shopify, liquid, and bootstrapify.

Skills **Known Coding Languages:** C#, C++, Bash, Batch, Python, PHP, HTML, Javascript, JQuery, SQL, Bootstrap, Liquid, Facebook API, Instagram API, and Steam API.
Applications known: Visual studios, Git, Source Tree, Bitbucket, Putty, Sublime Text, MAMP, and WAMP.
Has experience in technical support, algorithm design, Object Oriented programming, group programming, MVC, and basic game modding.
